ABSTRACT 2

ACKNOWLEDGEMENTS 4

LIST OF ABBREVIATIONS 8

GLOSSARY 12

DEDICATION 14

LIST OF TABLES 19

LIST OF FIGURES 20

CHAPTER 1
Introduction 27

- Background to Research 29
- Theoretical Framework 36
- Methodological Framework 38
- Organization of the Dissertation 41

CHAPTER 2
Theoretical Framework 45

- Horses in Grand Narratives of the European Bronze Age and in Grander Narratives of Human-Horse Relationships 46
- The Political Economy Approach 50
- Animals in a Political Economy Model 54
- Horses in the Political Economy of Bronze Age Hungary 58
- Hypotheses for Horses in the Political Economy Model of Bronze Age Hungary 64
- Human-Horse Relationships in a Multispecies Perspective 66

CHAPTER 3
Chronology, Cultures, and Contexts Part One: Sustenance to Herding and Travel, The Domestication, Introduction, and Spread of Horses into Hungary though the Early Bronze Age 71

- Sustenance 71
- Domestication 72
- The Early Copper Age: 4500/4400 – 4000 BC 77

The Middle Copper Age: 4000 – 3600/3500 BC....84
The Late Copper Age: 3600/3500 – 2800/2700 BC....87
The Early Bronze Age: 2800/2700 – 2000/1900 BC....87
Review through the EBA....111

CHAPTER 4
Chronology, Cultures, and Contexts Part Two: Herding and Travel to Politics and Warfare
The Dissemination and Spread of Horses in the Middle and Late Bronze Age of Hungary....113

The Middle Bronze Age: 2000/1900 – 1500/1450 BC....113
The Koszider Period: 1600 – 1500/1450 BC....146
The Late Bronze Age: 1450/1300 – 900/800 BC....151
Review of the MBA to the LBA....162

CHAPTER 5
Political Provenience:
Discerning Specialized Production of Horses in the Hungarian Bronze Age....165

Identifying the Number of Horses in Bronze Age Hungary....166
Relative Frequencies of Horses Compared Through Time....168
Defining a Surplus of Horses....174
Establishing an Estimated Living Stock of Horses....175
Determining Equestrian Specialists....178
Identifying Breeding Populations and Production Goals: Age Profiles....179
Materials and Methods for Determining Age-at-Death in Horses....180
Production Goals for the Horses in Bronze Age Hungary....181
Transportation Populations Compared....184
Determining Primary Versus Secondary Product Populations in Horses....185
Identifying Local Production and Exchange: Strontium Isotopes ($^{87}Sr/^{86}Sr$)....186
About Strontium Isotopes ($^{87}Sr/^{86}Sr$)....187
Materials and Methods....190
Results of the Strontium Isotope Analysis and Implications for Trade in Horses....192
Identifying Selection of Particular Traits in Horses....197
Genetic Research of the Selective Breeding of Horses in Prehistory....197
Quantifying Selection for Size and Type: Biometric Measurements of Horse Bones....200
Biometric Indices: Withers Height and the Slenderness Index....201
Results: Selecting for Size and Type in Bronze Age Horses....204
Summary of Horse Production and Use Implications in Bronze Age Hungary....212

CHAPTER 6
Pieces and Bits:
Thinking About and Using Horses in the Hungarian Bronze Age 215

Thinking About Horses 216
Body Part Representation 217
Cut Marks 228
Depositional Patterns 231
Tools 235
Summary of Thinking About Horses 236
Material Correlates of Using Horses: The Bits 238
Why Bits? 240
More than a Bit of a Problem 248
Riding and the Bridle Circle of the Bronze Age Carpathian Basin 252
Chariotry and the Don-Volga-Ural Bridle Circle 267
The Evidence for Chariots in the Hungarian Bronze Age 268
The Spiral Motif and Contacts of the European Bronze Age 271
Summary of Thinking About and Using Horses in the Hungarian Bronze Age 276

CHAPTER 7
Political Pathologies:
Osteopathologies of the Horses of the Hungarian Bronze Age 281

Dental and Cranial Bit and Bridle Pathologies of Horses 283
Methods for Identifying Bit and Bridle Wear on Horse Teeth and Crania 286
Analysis of Horse Teeth and Crania from Bronze Age Hungary 293
Post-Cranial Skeletal Pathologies in Horses 296
Description of Osteopathologies of Horse Bones 297
Rates and Locations of Osteopathologies in Modern and Archaeological Populations 300
The Spine 305
Shoulder and Hip 308
Legs 309
Summary of the Osteopathologies of Horses 316
Methods for Identifying Post-Cranial Osteopathologies in Horses 317
Analysis of Post-Cranial Horse Bones of the Hungarian Bronze Age 319
Summary of the Bit-Wear/Cranial and Post-Cranial Osteopathologies of the Horses of the Hungarian Bronze Age 326

CHAPTER 8
Becoming Equestrian:
Human Skeletal Pathologies from Bronze Age Hungary 329

Modern Equestrian Injuries 332
Rider Biomechanics 335

Archaeological Research of Rider's Syndrome 339
Case Studies of Riding in Archaeological Populations 343
Diagnostic Markers of Rider's Syndrome 347
Methods and Materials for Identifying Riding in Bronze Age Hungarian Skeletons 352
Results: Probable Riders in Bronze Age Hungary 354
Summary of the Equestrians of the Hungarian Bronze Age 364

CHAPTER 9
Synthesis and Conclusions:
Becoming Equestrian 366

Results: Horses in the Political Economy of Bronze Age Hungary 366
Equestrian Implications for the Political Economy Model of Bronze Age Hungary 374
Co-evolutionary Phases as Mutual Becomings 384
Key Findings 389
The Earliest Riders 389
The Earliest Riding was not Restricted by Sex or Class 390
The Earliest Post-Cranial Skeletal Pathologies in Horses: Riding and Not Chariotry 390
Big Enough to Ride: Selection for Increased Height and Greater Refinement 390
The Earliest Evidence for Trade of Horses 391
Increased and Different Cultural Importance 391
Little Evidence of Elite Control of Horses in Bronze Age Hungary: Dismounting the Male, Elite Chariot Warrior 392
An Integrated Methodology for Investigating Human-Horse Relationships 393
Future Research 393
